

# Research Summit

HOSTED IN COLLABORATION  
WITH SICB

Are you a scientist who identifies as Black, Indigenous or a Person of Color? Are you interested in participating in collaborative research that emphasizes local and indigenous knowledge? Are you passionate about community-based conservation? Do you want to be an ally who supports scientists in the Global South? If you answered yes to any of these questions, this summit is for you!

## WORKSHOPS

- Introduction to R
- Introduction to QGIS
- Community-based conservation best practices
- Predictive Modeling as a conservation tool
- Inclusive Research and Conservation Practices
- Media training

## WORKING GROUPS

- Opportunities to build collaborative research groups
- Groups will be cross-cultural and multi-disciplinary
- Emphasis will be placed on supporting scientists in the Global South and early career scientists
- Seed money will be awarded to working groups with strong proposals at the end of the summit

## OTHER ACTIVITIES

- Panel Discussions
- Open Forum on the state inclusivity in science
- Presentations by BIPOC scientists and scientists from the Global South
- Networking opportunities
